Update related

※ Local upgrade:

USB_update.bin file placed in USB root directory -- - > insert USB hole side - > click on the home page - > Settings - > system upgrades - > local upgrades

System restarts after the upgrade, normal use after the completion;

※ Online upgrade:

Ensure that the Smart Meeting Flat Panel is in normal connected state;

Click home --> Settings --> system upgrade --> online upgrade

System restarts after the upgrade, normal use after the completion;

U Share matching:

Smart Meeting Flat Panel:

Meeting Flat Panel boot - > U Share button inserts top matching (upgrade) port - > button start flashing - > 1 minute or so to stop flashing - > success

Computer:

Computer starting up - > U Share button insert computer U port -- - > run SKYWORTH EXE - > display tips of being able to share - > press - > start sharing

The computer needs to be operated manually for the first time (about 2 minutes), and automatic operation will be inserted later;

※ **U Share channel Settings:**
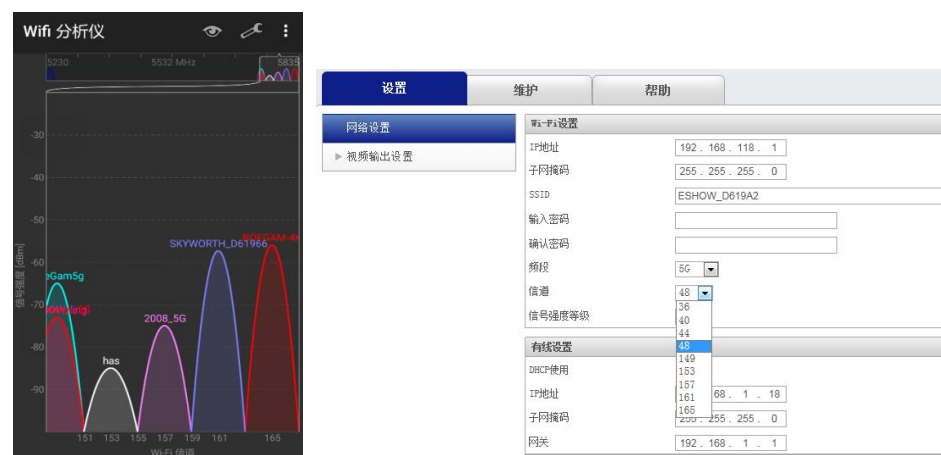

Setting background:

Generally the sources in a channel had better not exceed 3, otherwise it will affect the effect of screen sharing;

Signal detection:

Download and install "WiFi analyzer.APK" on android phone;

The default channel is 5g-161 channel;

Modify channel:

To login WEB is similar to login router, password and user name default is: admin;

5G frequency band, there are 9 channels to choose from, ensure that the sources of each channel do not exceed 3;

Simple troubleshooting
