LifeSymbols® Designs

Added to the corners of the casket, placed in an alcove or an urn, displayed on a memory table or placed on a keepsake plaque. LifeSymbols® designs are a touching expression of the spirit, personality and interests of a loved one. These popular enhancements are also used as individual keepsakes for friends and family. *See our Options Brochure for full details.*

LifeStories® Medallions

Featuring themes of spirituality, relationships and service, LifeStories medallions are a beautiful expression of what made a loved one special. These artfully crafted designs compliment a variety of wood and sheet bronze urns. *See our Options Brochure for full details.*

Crucifixes

Personalisation can become a touching reminder of all that made the loved one special. We offer crucifixes that can be used with all of our Batesville Caskets. Crucifixes to honour life and faith can be displayed to fit with the contours of the casket lid.

Living Memorial[®]

PROGRAMME

“I will smile when I think of a small sapling growing tall over the years to celebrate my husband’s life.”

The significance of a unique life is symbolised with the planting of a tree

The Living Memorial Programme is a unique and special way to honour the memory of a loved one. When you select an Options by Batesville cremation urn, casket or keepsake item, we arrange for a tree seedling to be planted in a national forest or woodland as a living tribute and memorial to the deceased. Established in 1976, the Living Memorial has helped to reforest thousands of acres of forests throughout the U.S., Canada, Australia and the United Kingdom.

More than just a majestic memorial, these trees shelter wildlife, reduce water and wind erosion and contribute to the purity of the air we breathe, helping to improve the environment for generations to come. The Living Memorial is funded by Batesville and executed with the U.S. Forest Service, The Canadian Forestry Association, The Grand River Conservation Foundation, and the United Kingdom National Forest. Tree species and planting locations are determined by these agencies, based on the greatest need in that region.
